Related Experience

City of Ammon Data Pipeline Project — Project Lead

Apr. 2026 – Jul. 2026

- Led a BYU-Idaho student consulting team building an automated municipal data pipeline for geospatial integration, ArcGIS-ready outputs, and urban growth decision support.
- Coordinated data inventory, ETL validation workflows, governance recommendations, and client-facing roadmap planning for future municipal analytics.

BYU-Idaho Data Science Society — VP Communications & Mentor

Apr. 2026 – Sep. 2026

- Coordinated society communications, project updates, and event messaging while connecting data science students with applied learning opportunities.
- Mentored new students through college transition, coursework expectations, academic planning, and campus resources.

AWS Database Integration Project — SQL / AWS / HTML

Aug. 2025 – Dec. 2025

- Deployed and managed a relational SQL database on AWS EC2/RDS to support structured storage, querying, and controlled data access.

Pioneer Baseball League Analytics — Python / Machine Learning

Jan. 2025 – Apr. 2025

- Collaborated with a data science team to build a machine learning model predicting player rank from baseball performance statistics.
- Designed a dynamic web scraper to collect, clean, and format player data for model training and evaluation.

Halda — Sales Development Representative

Provo, UT | Feb. 2023 – Aug. 2023

- Used HubSpot CRM to track outreach, strengthen customer relationships, and communicate with clients in a fast-paced sales environment.
